DETAILED ACTION

Response to Amendment

1. In response to the Amendment received on November 13, 2003, the examiner has carefully considered the amendments. The addition of newly added claims 10-17 has been acknowledged.

Response to Arguments

2. Applicant's arguments, see Response, filed November 13, 2003, with respect to claims 1-9 have been fully considered and are persuasive. The rejection of claims 1 and 4-7 under 35 USC 102(b) as being anticipated by Masakazu et al (JP 63214375) has been withdrawn. The rejection of claims 1 and 3-9 under 35 USC 102(b) as anticipated by or, in the alternative, under 35 USC 103(a) as being obvious over Hahn et al (4,170,663) has been withdrawn. The rejection of claim 2 under 35 USC 103(a) as being obvious over Hahn et al (4,170,663) has been withdrawn.

Allowable Subject Matter

3. Claims 1-17 are allowed.

4. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance is inclusion of curing by UV radiation in an oxygen containing protective gas having a oxygen partial pressure in the range from 0.5 to 18 kPa. The prior art, while teaching curing in oxygen containing gas, fails to teach an oxygen partial pressure of said gas in the range from 0.5 to 18 kPa. The prior art teaches it is customary to exclude most of the oxygen in a system when curing using radiation. Typical prior art curing systems call for oxygen in levels from 300 to 5000 ppm, preferably from 500 to 1500 ppm, which is less than the inventive amount.
